Objectives

I am a Full Stack (MERN Stack) Web Developer who works with various technologies such as React, Next.js, Express, Node, Mongo dB and other technologies to create functional websites and web applications. I am an open minded and constructive thinker who have started from scratch various long term projects as shown in my portfolio. I am currently pursuing the roles of either a frontend or backend or full stack web developer.

Education

Obafemi Awolowo University (2017 – 2022)

Experience

To-do App Creation for Client (06/2022)
